Adaptivation Resources

Workshop Kits

Adaptivation has several Workshop Kits available for loan. A variety of devices and applications are included along with handouts and a PowerPoint presentation. All devices have pre-recorded messages and arrive with overlays ready for your presentation. This is ideal for those seeking more experience with augmentative communication or those who require an assortment of technology for an inservice or presentation. Please visit www.adaptivation.com and look under Resources. Click on Workshop Kit Form to download and print your copy or call (605) 335-4445.

Trial Program

Adaptivation has a two-week trial program for several of our switches, communication aids and environmental controls. Our trial request form is on our website. Please visit www.adaptivation.com and look under Resources. Click on “Trial Form” to download and print your copy or call Adaptivation at (605) 335-4445.

Website

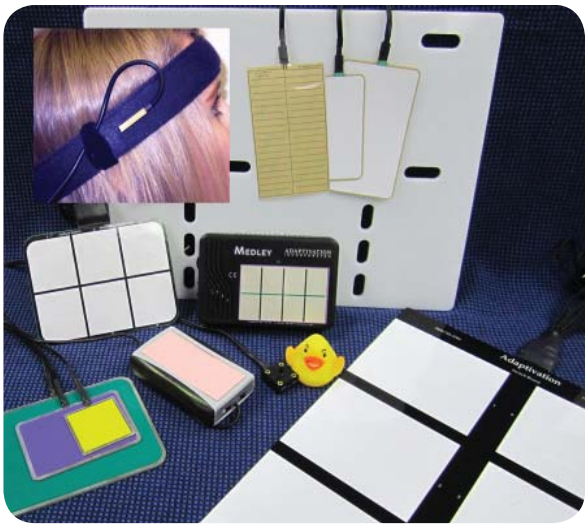
Our website, www.adaptivation.com, has our catalog, Idea Album, handouts, presentations, catalog, printable instruction manuals for current and discontinued products, product information and photos, current pricing, and dealer information.

Switch Kit

Access is the key to communication success. This kit contains a wide variety of switches, each with unique features, making it a great combination for individual, classroom or evaluation use. Our switches work great for visual cuing with a variety of visual cues, including objects.

-Medley (p. 7)
-SwitchBoard (p. 10)
-SixPack (p. 10)
-Three Pal Pads (p. 9)
-Taction Pad (p. 9)
-Flexible Switch Set (p. 10)
-Pneumatic Switch Kit (p. 10)
-Bright Box Tactile (p. 11)
-Dipsy (p. 11)
-HandiBoard (p. 13)
-Taction Pad Adaptor (p. 9) *Not shown in photo*

KIT-SW.....$955.80



Quick Communication System

Our most popular devices have been grouped to form a complete and effective communication system that is simple to use and simple to access. Great for classrooms, small groups or individual use!

-Medley (p. 7)
-Sequencer (p. 5)
-Randomizer (p. 5)
-Chipper (p. 5)
-Three Pal Pads (p. 9)

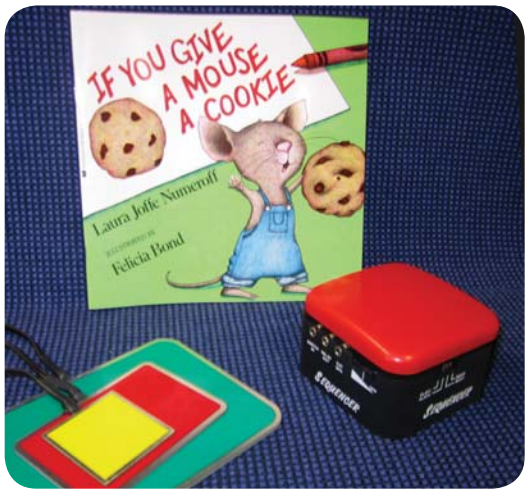
KIT-ULT.....$1,072.80

Literacy Kit

Literacy is the key to learning. This kit contains everything needed to adapt a variety of books. The technology included in this kit allows you to create engaging literacy activities and much more. Many ideas are included!

-Sequencer (p. 5)
-Six Overlay Pockets (p. 9)
-Three Pal Pads (p. 9)
-Book to be adapted

KIT-LIT.....$297.90



Computer Interface Kit

The Computer Interface Kit is ideal for individuals who need to access a computer via switches.

-ATEC Computer Switch Interface (p. 14)
-SwitchBoard (p. 10)
-SixPack (p. 10)
-Three Pal Pads (p. 9)
-HandiBoard (p. 13)

KIT-CI.....$458.96

Scanning/Evaluation Kit

Duplicate the important features of many high-tech devices, including scanning. This system provides a variety of scanning options in a simple-to-use and simple-to-change format. Specially designed to accommodate scanners at the object level. An unbelievable array of scanning features including two-button, auditory and cue-word scanning, plus many more!

-VoicePal Levels (p. 8)
-Small LEDs (p. 8)
-Sequencer (p. 5)
-Three Pal Pads (p. 9)
-Dipsy (p. 11)
-Flexible Switch Set (p. 10)

-HandiBoard (p. 13)

KIT-SEK.....$819.90

Custom Communication System

Choose a combination of products from Adaptivation's catalog that best suit the feature matching and access needs of communication. Discounted cost to be determined.

KIT-CUS.....Call Adaptivation to design your own system and to determine pricing!

Chipper

The Chipper is a single-message communication aid with the feature of two independent levels. Each level has 90 seconds of record time for a total of 3 minutes. It utilizes digital recording technology to allow for natural-voice communication. The Chipper has an external switch jack, an external speaker jack and a relay jack for cause-effect. The Chipper has excellent sound quality and a long battery life. Includes one 9-volt battery.

Dimensions: 3.5” x 3.5” x 2.25; Weight: 10 oz.

CH-ME (please specify color)**.....$119**

Sequencer

The Sequencer is a communication aid that allows you to record and play back messages in sequence. The Sequencer has 3 minutes of record time, 90 seconds per level. Each level is recorded independently. Can also be used as a single-message device! The Sequencer has an external switch jack, an external speaker jack and a relay jack for cause-effect. The Sequencer has excellent sound quality and a long battery life. Includes one 9-volt battery.

Dimensions: 3.5” x 3.5” x 2.25”; Weight: 10 oz.

SE-ME (please specify color)**.....$169**

Randomizer Gamer

The Randomizer is a communication aid that plays messages in random order. Modes of operation include single message, jumble (messages play in random order), and eliminator (messages occur in random order, but once a message is played, that message is not played again until all messages have been played). 3 minutes of record time (90 seconds per level) for two separate, easy-to-record activities. The Randomizer has an external switch jack, an external speaker jack and a relay jack for cause-effect. Includes one 9-volt battery.

Dimensions: 3.5” x 3.5” x 2.25”; Weight: 10 oz.

RAND (please specify color)**.....$149**

Tangible Object Cards

Object Communication System

A system that facilitates communication for people whose understanding is enhanced through objects. This includes young children, individuals with blind/low vision, autism, stroke or TBI. The core set consists of 20 different objects mounted on durable plastic cards. The core set includes: bathroom, bed, brush teeth, clean, comb, computer, cook, dress, drink, eat, game, listen, money, outside, play, read, shop, TV, wash, and work. Tangible Object Cards come with a blank symbol card so you can customize them with your favorite communication symbols or pictures. *Adaptivation also offers symbol cards with SymbolStix symbols in full color (SS) or high-contrast black & white (BW). Receive a discount with the bundle of all 50 cards!*
Object cards (4¾" x 5¾"). Symbol cards (3⅜" x 2⅛").

TOC-BNK w/blank symbol cards**.....$29**

Evrything you need to customize your own supplemental set. Includes 5 pre-drilled object cards, zip ties, Velcro® fastener material. You supply your own objects.

To view pictures of supplemental set cards, visit our website at www.adaptivation.com

Tangible Object Lex Bundle

Visual cuing with objects is essential for many individuals. This bundle with a combination of objects and simple-to-use technology accommodates multiple students with a variety of needs, and offers many possibilities (e.g., visual schedules, choice making, and object-picture transitioning). Bundle includes 3 Lex communication aids and either 20 or 50 object cards with blank symbol cards. *Adaptivation also offers symbol cards with SymbolStix symbols in full color (SS) or high-contrast black & white (BW).*

Bundle of 20
Includes Tangible Object Card Core set, 20 blank symbol cards and 3 Lex Communication Aids.

KIT-CS20.....$639

Includes Tangible Object Card Core set, all 30 supplemental set cards, 50 blank symbol cards and 3 Lex Communication Aids.

KIT-CS50.....$919
KIT-CS50-SS...w/color SymbolStix.....$964
KIT-CS50-BW...w/B&W SymbolStix....$964

Bundle of 20 shown with color SymbolStix option

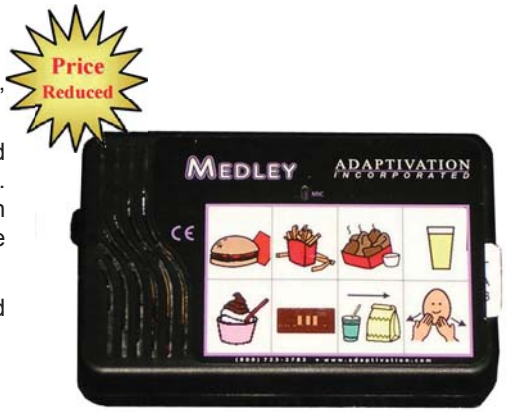
Lex

The Lex is a single-message communication aid with three levels. Natural-voice messages can be recorded and stored for single-message playback (up to one minute of record time). The Lex is pressure sensitive and activates without a click. This device has great sound quality and messages can be recorded in any order.

The Lex is a good companion for Adaptivation's Tangible Object communication cards, see page 6. Includes four AAA batteries.
Dimensions: 8.5" x 5.5" x 1.75"; Weight: 15 oz.

LEX.....$169

Medley



All in one! The Medley combines our most popular features of direct selection, sequencing, randomizing and external switch use into one simple-to-use device.

Touch the Medley's built-in keypad or connect up to 8 external switches with standard plugs to record and play back natural-voice messages (11 seconds per message). Sequencing and Randomizing features are accessed by plugging your favorite switch into the corresponding jack. Recording on the Medley is easy and messages can be recorded in any order.

The Medley pairs well with Adaptivation's SwitchBoard or with PalPads (pg. 9) and a HandiBoard (pg. 13) to make a customized picture board or object board.

Includes four AAA batteries.
Dimensions: 5.75" x 3.75" x 1.25"; Weight: 10 oz

MEDLEY.....$229

Alligator Wires

Alligator Wires function much as Adaptivation's familiar Taction Pads™ (pg. 9). They can be used to turn many objects or surfaces into switches. Alligator Wires plug into any Adaptivation product with an external switch jack (Sequencer, Medley, VoicePal Levels, Taction Pad Adaptor, LinkSwitch, etc.). The other end of the wire has a clamping "alligator clip" that is attached to an object. When the object is touched by the student, your communication device is activated. There are two types of Alligator Wires:

- Master Alligator Wire: This wire has the addition of a wrist strap that fits over the student's wrist. This wrist strap is necessary for proper operation. Also part of the Master Wire are the alligator clip and the plug that goes into your device (see description above).
- Slave Alligator Wire: This wire has only the plug and the alligator clip. Proper function requires at least one Master Wire (see above). Additional Slave Wires allow you to connect additional objects, converting them to a switch.

About Alligator Wires

The objects that function with Alligator Wires must be able to conduct electricity at a low level. This means that they will likely have moisture within them, or consist of metal. Examples of objects that can be converted to a switch with an Alligator Wire include but are not limited to: most fruits and moist foods, keys, coins, silverware (not plastic), pots & pans, metal jewelry, conductive ink, pencil lead (including patterns written on paper), aluminum foil, water, conductive tape (type used to wire doll houses for electricity), wire, paper clip, damp sponge, some plants, other people.

There is a popular device, not associated with Adaptivation, known as the Makey Makey. This works in a manner similar to Adaptivation's Alligator Wires. There are several videos available on the internet (search YouTube) that show the Makey Makey in several applications. Anything that the Makey Makey can convert into a switch can also be made into a switch by Alligator Wires. While the Makey Makey connects directly to a computer, Alligator Wires connect to Adaptivation products. Watch www.adaptivation.com for application ideas using Alligator Wires, various objects, and Adaptivation communication devices.

AW-M *(Master Alligator Wire - required)*.....**$35** **AW-3S** *(Set of three Slave Alligator Wires - optional for additional objects)*.....**$45**

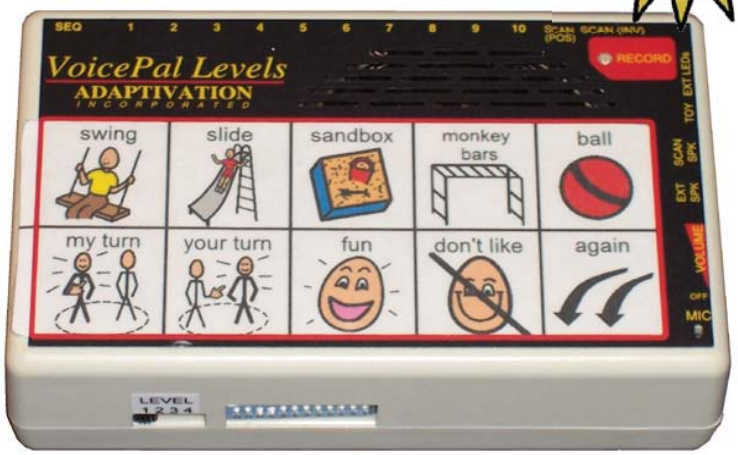
VoicePal Levels

The VoicePal Levels is a four-level, customizable, natural-voice communication aid for anyone experiencing communication challenges. The VoicePal Levels is a perfect evaluation tool and can adapt to the growing skills of an individual. It is portable, lightweight and has many programming options. Messages can be accessed by direct selection using the on-board keypad, by plugging adaptive switches into the external jacks or by scanning, either visually or auditorily. Slip a symbol or picture overlay into the built-in pouch to customize the keypad (2, 3, 5 or 10 messages). Total record time is 17.5 minutes. For further details, see the "Quick Setup Guide" or the manual on the "Manuals" tab at www.adaptivation.com. Includes four AA batteries.

Dimensions: 6" x 3.5" x 1.75"; Weight: 1.5 lbs.

VP-M17-X.....$399
VP-M17-T (includes Taction Pad Set)**.....$449**

Price Reduced



VoicePal Levels Basic Features

-Four Levels
-17.5 minutes of record time
-Sequential Messaging
-Random Messaging
-2, 3, 5 or 10 Message Configuration
-10 External Switch Jacks
-Delayed Activation
-Relay Output for Cause-Effect
-External Speaker Jack
-Scan Speaker Jack

VoicePal Levels Scanning Features

-Positive & Inverse Scanning
-Visual Scanning
-Auditory Scanning
-Full-Message Scanning
-Cue-Word Scanning
-Object Scanning Capability
-Nested Scanning

LEDs and Vibrating Motors for the Voice Pal Levels

LEDs and Vibrating Motors are great tools for beginning scanners. Simply attach to objects, and plug into VoicePal Levels to begin object-based scanning. Comes with three LEDs or three Vibrating Motors. LEDs are available in two sizes.

VP-LED (5/16")**.....$30**
VP-LED/LG (3/4")**.....$45**
VP-VBM.....$35

Carrying Case

Custom designed to protect the VoicePal Levels from bumps, spills and other environmental hazards. The carrying case can be hung over the shoulder or worn around the waist and readily flipped up to provide immediate access to your VoicePal Levels.

CC-VP.....$59

Pal Pads

Pal Pads are pressure-activated membrane switches requiring the slightest touch (1.2 ounces of force), whether it comes from directly above or at a shallow angle. Equipped with a standard plug, these switches can be used with any communication aid or battery-operated assistive device that has a standard jack. The rigid and durable Pal Pads are approximately one tenth inch thick.

PAL-LG (4.5" x 6" - specify color)**.....$49**

Overlay Pockets

Overlay Pockets are clear, adhesive-backed pockets ideal for placing on top of switches, AAC devices or communication boards. Overlay Pockets also make great Pal Pad holders in adapted activities.

PT-ME (3" x 3")**.....$4**
PT-SM (3.75" x 4.5")**.....$4**
PT-LG (4.5" x 6.5")**.....$4**

Taction Pads™

Taction Pads are clear, adhesive-backed plastic switches that are activated by contact with your skin. Simply peel the backing off and stick the Taction Pad on almost any object or surface. *Taction Pads require a Taction Pad Adaptor to operate with non-Adaptivation devices and with switch adapted toys.*

TPAD-A (2" x 4")**.....$18**
TPAD-A2 (2" x 4") small fingers**.....$18**
TPAD-C (1/10" x 24")**.....$18**

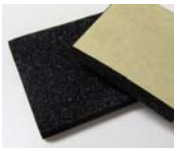
TPAD-S (Set of 4)**.....$65**

Taction Pad Adaptor

Now you can use Taction Pad switches for any device with a standard jack! Simply plug the Taction Pad into the Taction Pad Adaptor, then connect the Taction Pad Adaptor to your device. Includes one 3V coin battery.
Dimensions: 1.4" x 1.4" x .6" *Release date 3rd quarter of 2013.*

TP-ADAPT $49



Conductive Foam

Adaptivation's Conductive Foam takes the place of skin when an individual cannot directly touch a Taction Pad. Conductive Foam is also compatible with most touch screens. Black foam with adhesive on one side.

CFS-2 (2" x 2" x 1/4")**.....$4**

Flexible Switch

The Flexible Switch is a bendable, pressure-activated switch requiring the slightest touch (less than two ounces) whether the touch comes from directly above or at a shallow angle. The Flexible Switch has a standard plug and can be used with communication aids or battery-operated devices that have a standard jack. Each Flexible Switch Set includes one 2 x 4 inch switch and one 3 x 5 inch switch.

FLX-SET (one 2" x 4", one 3" x 5")**.....$59**

Pneumatic Switch Kit

Activate this fun and innovative pneumatic switch with only a puff of air. Show your creative side and find encouraging ways for individuals to activate this switch. The Pneumatic Switch can be easily used with all kinds of squeeze toys, bottles or balls. Allows you to create your own object-based switch. The Pneumatic Switch has a standard plug and can be used to activate communication aids and switch adapted devices. Includes Pneumatic Switch, squeeze toy and an activity sheet.

PNSW.....$59

SixPack

The SixPack has six built-in pressure switches measuring 2" x 1.75" each. The SixPack can function as an adapted mouse through a computer switch interface *(see page 14)*, or as six compact external switches to activate a communication aid. Press the individual cells for operation. Uses standard jacks. Activation force: 1.25 oz.;
Dimensions: 6" x 4.5"; Weight: .25 lbs.; Activation force: 1.25 oz.

Price Reduced

SIXP.....$89

Contact Adaptivation for availability of the SixPack with a DB9 connector.

SwitchBoard

The SwitchBoard has six built-in pressure switches with clear pockets in which you can place your own pictures or symbols. Each switch measures 4" x 5". Objects can also be used as visual cues on each switch area. The SwitchBoard can function as an adapted mouse through a computer switch interface *(see page 14)*, or as six external switches to activate a communication aid.
Dimensions: 16" x 12" x 5/32"; Weight: 1.5 lbs.

SWBD.....$174

Dipsy

The Dipsy Switch is a tilt-sensitive *(mercury free)* switch which can be attached to the head, arm, finger or any appropriate object. This switch can be used for posture training and other access needs. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. It can also be adjusted for sensitivity by increasing or decreasing the switch's mounting angle. The Dipsy has a standard plug and can be used with any communication aid, environmental control or battery-adapted device that has a standard jack. The Dipsy includes a headband and two finger mounts, which can also be used to secure the cord to the headband.

DIP.....$59

Bright Box & Bright Box Tactile

Bright Box Switches are great for users with low vision, for nighttime use, or simply to attract attention. Press the top surface to activate switch adapted toys, mouse interfaces, or communication devices.

The **Bright Box** lights up for visual feedback. The Light Switch has three functions: Off, On and Continuous. The Power Switch has three functions: Lo, Hi and Flash. (Includes one 9-volt battery)
Dimensions: 4.25" x 2.5" x 1"; Weight: 6 oz.

The **Bright Box Tactile** has visual *and* tactile feedback. The visual feedback and tactile feedback (much like that of a cell phone or pager) can be employed independently of each other. The Light Switch has three functions: Off, On and Flash. The Tactile Switch has three functions: Off, On and Pulse. (Includes one 9-volt battery)
Dimensions: 4.25" x 2.5" x 1"; Weight: 6 oz.

Bright Box Tactile

Adaptivation's AC adaptor (sold separately) can be used in place of a battery to operate the Bright Box or Bright Box Tactile. This is especially useful when the device is turned on for an extended period of time.

BBX.....$129
BBXT (Tactile)**.....$149**
AC9V (adaptor)**.....$9**

TableTapper

Place the TableTapper Switch on a hard surface such as a tabletop or counter, and activate communication aids or battery operated devices by tapping on the table or counter surface. The TableTapper Switch has two modes of control (latch and timing) and a variable sensitivity ranging from a light tap to a hard pound. The TableTapper has a standard plug. Includes one 9-volt battery.
Dimensions: 2.5" x 2.5" x 1"; Weight: 6 oz.

TTPR.....$149

FreeHand

Price Reduced

The FreeHand is an environmental control device (ECU) that allows nearly any AC appliance to be activated with wireless convenience when used in conjunction with an X-10 transceiver module. Because the FreeHand utilizes radio frequencies, activation can take place from across the room or down the hall. Cordless operation eliminates barriers and promotes safety. Range 75 feet. Includes transceiver module and one 9-volt battery. See website for other X-10 modules.
Dimensions: 3.5" x 3.5" x 2.25"; Weight: 8 oz.

FH-SK (includes transceiver)**.....$155**

LinkSwitch

Price Reduced

The LinkSwitch is a switch-latch timer that enables individuals to activate battery-operated devices using any adaptive switch with a standard plug. Simply plug both the switch and the toy or other battery operated device into the LinkSwitch, then touch the switch to activate. All LinkSwitch devices come with dual-channel modes and add latching, timing, and reverse timing capabilities to battery-operated devices. Includes one 9-volt battery.

Use "Media Mode" on the LinkSwitch to activate a Digital Talking Book Player (DTBP) from your state's Braille and Talking Book services. With the LinkSwitch connected to the player through a Swifty or other USB interface, the activation of a single switch turns the digital book player on for an adjustable amount of time. The player then turns off, requiring the user to activate the switch again to continue to listen to the recording. This feature is great for anyone who needs processing time. Also useful for movies or other multimedia on your computer.
Dimension: 4.25" x 3.25" x 1.5"; Weight: 12 oz.

DLT-202.....$99

"Media Mode" setup

Check www.adaptivation.com for setup guides for Media Mode for use with a Digital Talking Book Player, Swifty and Beam.

Battery Interrupters

Adaptivation's Battery Interrupter allows you to modify battery-operated devices for switch input. Simply place the Battery Interrupter between the battery and its connection point in the battery compartment. Place the battery-operated device in its ON position. Plug your switch into the input jack of the Battery Interrupter, and you're set!

BI-050 (AA & AAA).....**$13**
BI-075 (C & D).....**$13**

Computer Switch Interfaces by Origin Instruments

Prices subject to change

Tapio™

Tapio is a native USB switch interface that can be connected to an Apple iOS Device using an Apple USB camera adapter. It accepts industry standard 3.5 mm stereo or mono plugs, and directly interfaces up to two adaptive switches to an Apple iOS Device or computer. Tapio is powered from the device, and does not require external power.

OTAP.....$99.95

Swifty™

USB Interface for switches. Swifty is a USB switch interface in an extremely compact design. Working with up to two wired switches, or three wirelessly through Beam™, this pint-sized powerhouse can output mouse clicks, joystick buttons or keyboard characters. Supports USB Remote Wakeup. Automatically detects stereo plug (for two-switch input) or mono plug (single switch). Swifty™ is the perfect companion with the LinkSwitch, see above.

OSWF.....$79.95

Beam™

Beam™ is an infrared transmitter that communicates to the Swifty™ for wireless adaptive switch access. Beam can send three switch functions that Swifty™ interprets as mouse buttons, joystick buttons or keyboard keys based on Swifty™ configuration.

OBIST.....$149.95

Personal Pager

The Personal Pager emits a chime or vibration alert when the transmitter is pressed. The Personal Pager is battery operated, completely wireless and very compact. Simply slide a switch to choose chime or vibration alert modes (PP-CH/VBS-XM). Adaptivation offers a switch input version (PP-CH/VBS) which has been adapted to allow access by most available switches. The pager has a range of 75 feet. Multiple units, when used in proximity, may cause interference with each other. Not approved to be used as a nurse-call. Two AA batteries included with the switch input version.

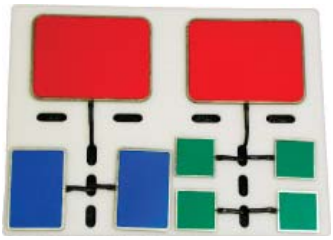
PP-CH/VBS (Switch Input).....**$99**
PP-CH/VBS-XM (Standard).....**$45**

Accessories

HandiBoard

The HandiBoard works great for organizing cords and devices! Just attach items to the top of the HandiBoard and pull cords to the back.
Dimensions: 15.5” x 11.75” x .25”

HBD.....$44



Dual Lock

Dual Lock is five times stronger than conventional hook and loop fasteners and adheres instantly to many surfaces (1” wide).

DLK-2.....$.95/inch
Minimum order 10”

VELCRO® brand fasteners

Industrial-Strength VELCRO® brand fasteners work great on difficult surfaces (2” wide).

Male-Male Cable Connector

The Male-Male Cable Connector can be used to connect a battery-operated device to the relay/toy jack of a communication aid.

CC-6 (30”).....**$12**
CC-2 (12”).....**$10**

Female-Male Cable Connector

A Female-Male Cable Connector can be used as an extension cord for switches such as Pal Pads.

CC-FM (30”).....**$12**

ATEC Computer Switch Interface

Prices subject to change.

The ATEC Computer Switch Interface allows connection of up to five switches to a USB port, and is the lowest-priced of all the standard interfaces. It even remembers your settings when you turn the computer off! In addition to the usual settings found on other devices, the ATEC Computer Switch Interface adds a setting for mouse control. The user can use five switches to move the mouse up, down, left, right, and click. Pictured at right is the ATEC Computer Switch Interface paired with Adaptivation's SixPack (p. 10).

CSIAT.....$69.95

Shown with SixPack, sold separately, page 10

ZYGO-USA

Additional products available. Prices subject to change.

Zybox for iOS (30 pin or Lightning Connector)

Price Reduced

The ZyBox for iOS is the simplest way to use control switches for alternative access to operate your iPad or other iOS device. Connect the ZyBox for iOS to your iPad using the Lightning or 30-pin dock connector, plug in one, two, or up to six control switches with standard plugs, and you have access to the entire iPad and any or all apps that are compatible with the iOS Voice Over (VO) commands. BlueTooth remains available.

The ZyBox will automatically recognize the mode based on the number of switches it identifies as plugged in. A list of commands is printed on the back of the ZyBox so you can easily see what each switch does when pressed.

ZB30.....30 Pin for iOS (Voiceover) **$245**
ZB30-7...30 Pin for iOS7 **$245**
ZBL.....Lightning for iOS (Voiceover) **$280**
ZBL-7..Lightning for iOS7 **$295**

Marblesoft

Additional titles available. Prices subject to change.

Single Switch Games 2

Includes 14 games, including four, two-player single switch games. Four modes of play for students with multiple disabilities, including cause and effect and a special demo mode. All activities are controlled with a single switch. **WIN XP [or newer], Mac OS 10.1 [or newer].**

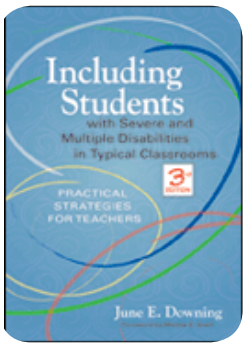
Including Students with Severe and Multiple Disabilities in Typical Classrooms, Third Edition

By June E. Downing, Ph.D., with invited contributors



Including Students
with Severe and Multiple Disabilities in Typical Classrooms
PRACTICAL STRATEGIES FOR TEACHERS
June E. Downing

This book gives teachers all the latest research-based, practical strategies for fully including students with sensory impairments and cognitive and physical disabilities. A helpful Q & A chapter gives teachers straightforward advice on addressing their most common challenges. This trusted guide and widely used textbook will help teachers maintain high expectations for students with severe and multiple disabilities and create successful inclusive classrooms where every child learns. © 2008

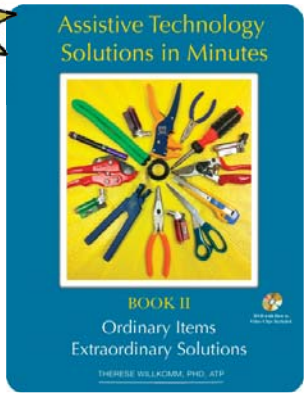
Assistive Technology in Minutes II: Ordinary Items Extraordinary Solutions

By Therese Willkomm, Ph.D.



Assistive technology "MacGyver" Therese Willkomm, Ph.D., returns with her second book of five-minute, low-cost approaches for taking ordinary items and turning them into extraordinary solutions for individuals with disabilities. Picking up where the first book left off, AT Solutions in Minutes II demonstrates creative DIY problem solving without the need for power tools or electricity, empowering everyone to be spontaneous and create solutions to everyday challenges using everyday materials.

This full-color text contains over 750 photographs with step-by-step fabrication instructions. Every solution can be made using simple and readily-available tools like a utility knife, pliers, scissors, a wire stripper, and a mini blowtorch, among others. The book also comes with a DVD featuring 115 "how-to" video clips and printable PDF "recipe" sheets for easy sharing. The DVD also contains an accessible copy of the book with picture descriptions for individuals who experience visual impairments.

Thanks to a grant from the Gibney Foundation, one hundred percent of the proceeds from this book will fund assistive technology devices for New Hampshire's device loan and demonstration programs. © 2013 *(See www.adaptivation.com for Volume 1)*

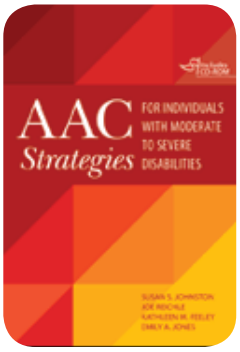
AAC Strategies for Individuals with Moderate to Severe Disabilities

Edited by Susan S. Johnston, Joe Reichle, Kathleen M. Feeley, & Emily A. Jones

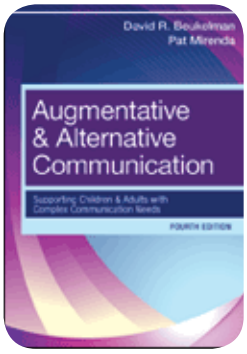


Essential for SLPs, OTs, PTs, educators, and other professionals in school settings, this book helps readers establish a beginning functional communicative repertoire for learners with severe disabilities. Professionals will start with an in-depth intervention framework, including a guide to AAC modes and technologies, variables to consider when selecting AAC, and how AAC research can be used to support practice. Then they'll get explicit, evidence-based instructional strategies they'll use to help children and young adults. Includes a CD-ROM with more than 35 blank forms and sample filled-in forms. © 2012

AACS.....$57

Augmentative and Alternative Communication Supporting Children and Adults with Complex Needs, Fourth Edition

By David R. Beukelman, Ph.D., & Pat Mirenda, Ph.D.

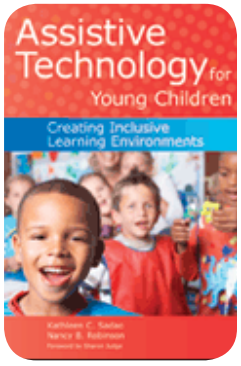


This definitive textbook incorporates critical information on implementing augmentative and alternative communication (AAC). It explains principles and procedures of AAC assessment and offers intervention techniques that are appropriate throughout the life span of children and adults with congenital or acquired communication disorders. This third edition offers new and expanded information on adults with degenerative language or cognition disorders, adults with acquired disabilities, capability assessment, terminology that reflects the recommendations of the International Society of Augmentative and Alternative Communication (ISAAC) and examples that reflect the most recent AAC devices and interventions. © 2013

AACB.....$85

Assistive Technology for Young Children: Creating Inclusive Learning Environments

By Kathleen C. Sadao, Ed.D. & Nancy B. Robinson, Ph.D., CCC-SLP



Developed by two leading early childhood specialists with in-depth expertise in assistive technology, this book demystifies AT and gives readers solutions they can implement right away, regardless of their technical experience. Early childhood professionals will learn about the broad spectrum of AT supports for children with disabilities—from low-cost, low-tech options such as Velcro and homemade switches to higher tech options such as speech-generating software. A must for AT novices and seasoned users alike, this professional resource and supplemental textbook will help readers use the best of today's technology to ensure a fully inclusive education for young children. © 2010

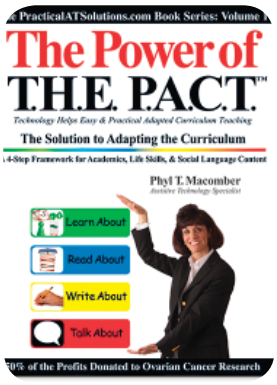
The Power of T.H.E. P.A.C.T.

By Phyl Macomber



Phyl T Macomber is an assistive technology specialist, author and national speaker on topics of adapted curriculum, augmentative communication, collaborative team building and specialized software. Her first book, The Power of T.H.E. P.A.C.T. is the manual that provides in-depth instruction for any instructor on how to adapt curriculum content in an easy 4-step, language-based learning format that is reasonable to implement in a given day. T.H.E. P.A.C.T. has enabled teams to become more efficient, more productive, and more cost-effective, while providing meaningful instruction to individuals with disabilities of any age. It will give you the roadmap you have been missing when adapting any curriculum. © 2010
